—  
All-glass double-acting door system

# DORMA VISUR

Design & function in perfect transparency

The sophisticated VISUR double-acting pivot system from DORMA makes it possible to create all-glass double-acting doors without any visible fittings. All hardware components are located in the surrounding structures of the door panel.

Because the door fittings are so unobtrusive, architects and specifiers are free to choose any material and any color for the surrounding structures. The transparent door reflects and enhances their design to maximum advantage.

DORMA products are known for their outstanding quality and VISUR is no exception. Endurance tests have subjected the VISUR double-acting pivot system to 500,000 operating cycles. These tests prove that an all-glass VISUR door will stand up to demanding traffic over time—embodying design and function in perfect transparency.

## Applications

- For single & double door applications with a header depth of 4-3/4" (120 mm).

## Options

Complete set including header tube, RTS 88, top and bottom pivot.

- **Item Number 803.770**  
single door
- **Item Number 803.771**  
double door

## Material and finish

- Aluminum anodized 114

## Dimensions

- Glass thickness:  
3/8" / 1/2" (10 / 12 mm)
- Max. door panel weight:  
187 lbs. (85 kg)
- Max. door panel width:  
43-3/8" (1100 mm)
- Max. door panel height:  
98-7/16" (2500 mm)

**Note:** Specify header length to fit clear opening.

## Applications

- Office
- Retail
- Conference Room
- Health Care

Beautifully concealed overhead door closers
